

The COVID-19 Outbreak

When Innovation meets the challenge

Innovation Models

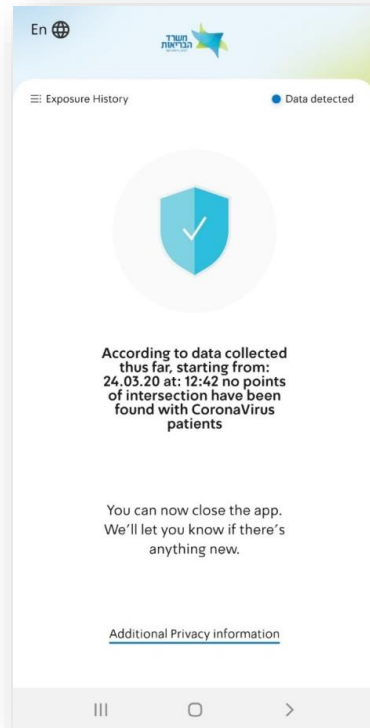

Innovation from Within
Innovation from Outside

The COVID-19 outbreak accelerated the need for MOH's active deployment of national digital health solutions such as:

- 1 Citizen engagement digital tools
- 2 Telehealth and remote care
- 3 Diagnostic tools

Citizen Engagement Digital Tools

HaMagen (The Shield) App

Inform whether the app user might have been exposed to a confirmed COVID-19 patient

CoronApp & Telegram

Official Communication channels

Remote screening for concerned patients

Personalized guidance to patients based on a thorough self-assessment

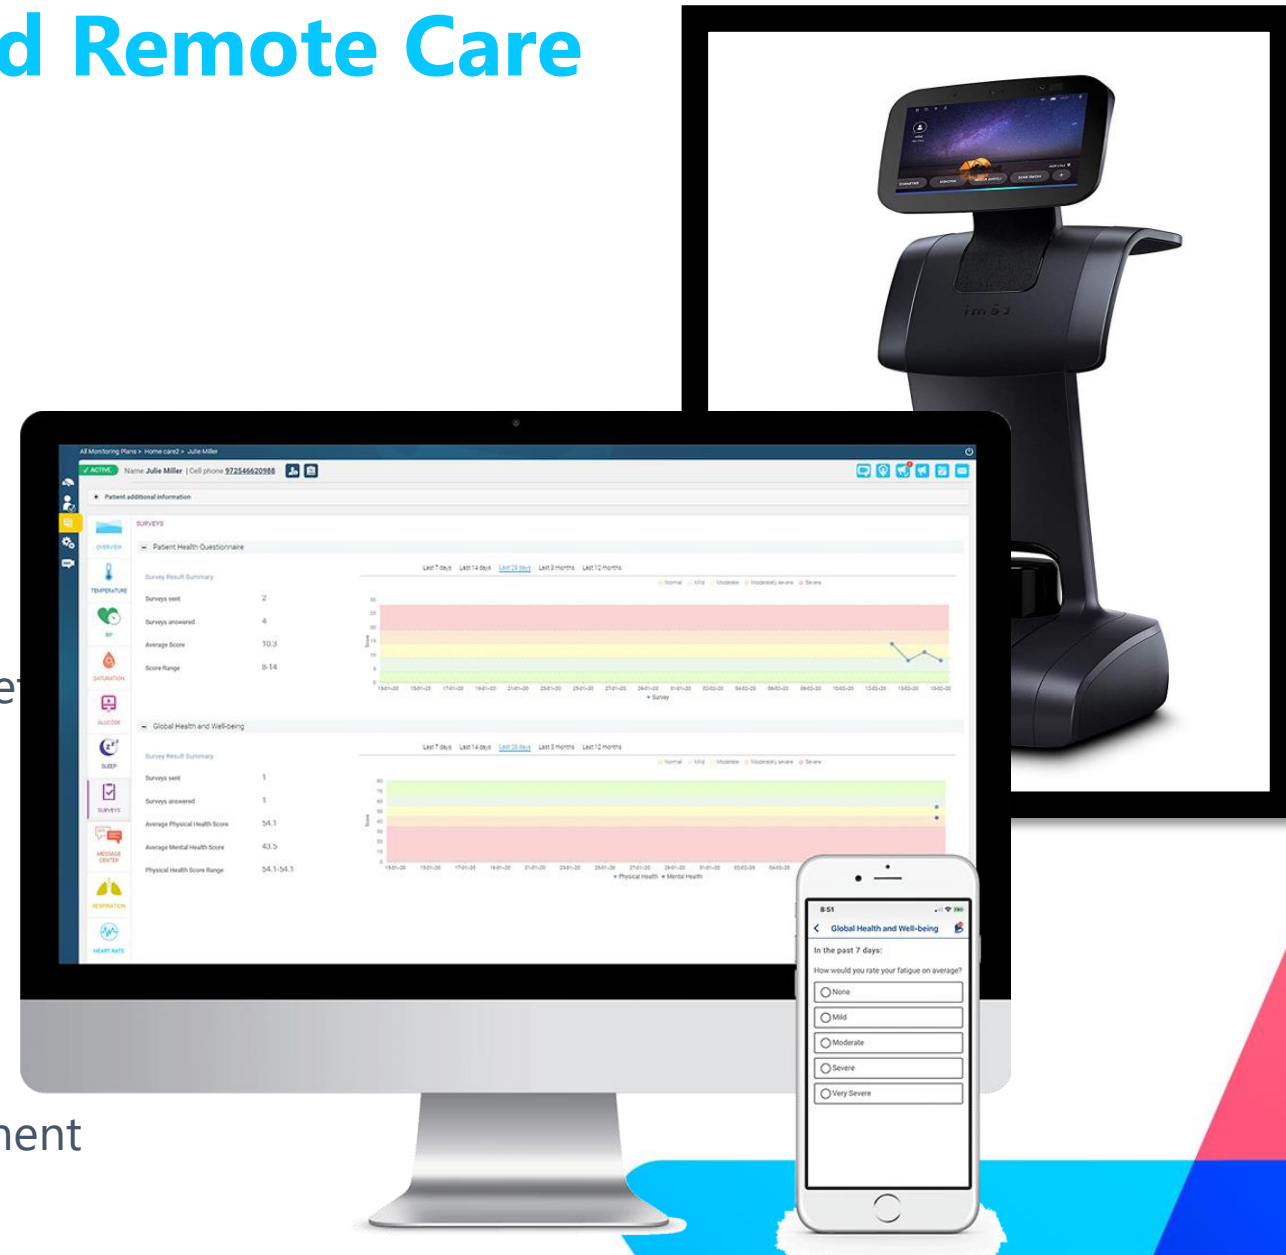

Telehealth and Remote Care

Robots

- Used in corona's departments
- Protect the medical team
- Equipment transfer, video & audio communication, etc.

Telehealth platforms

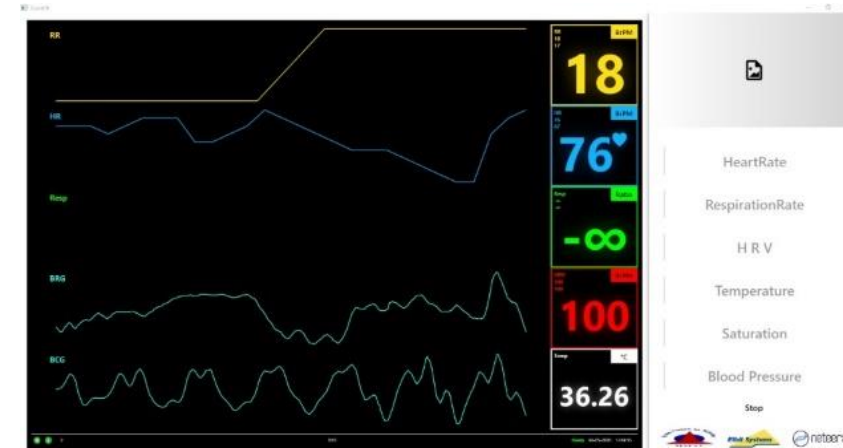

- Reduce the load from hospitals
- Save on high risk populations on their safe environment

Diagnostic Tools

Triage Radar

- Used in the Emergency Departments
- Vital signs remote measuring
- Based on military product

Corona Fast Test

- Unique collaboration with Ministry of Defense
- Test by exhalation
- Results up to 2 min
- More specific than PCR

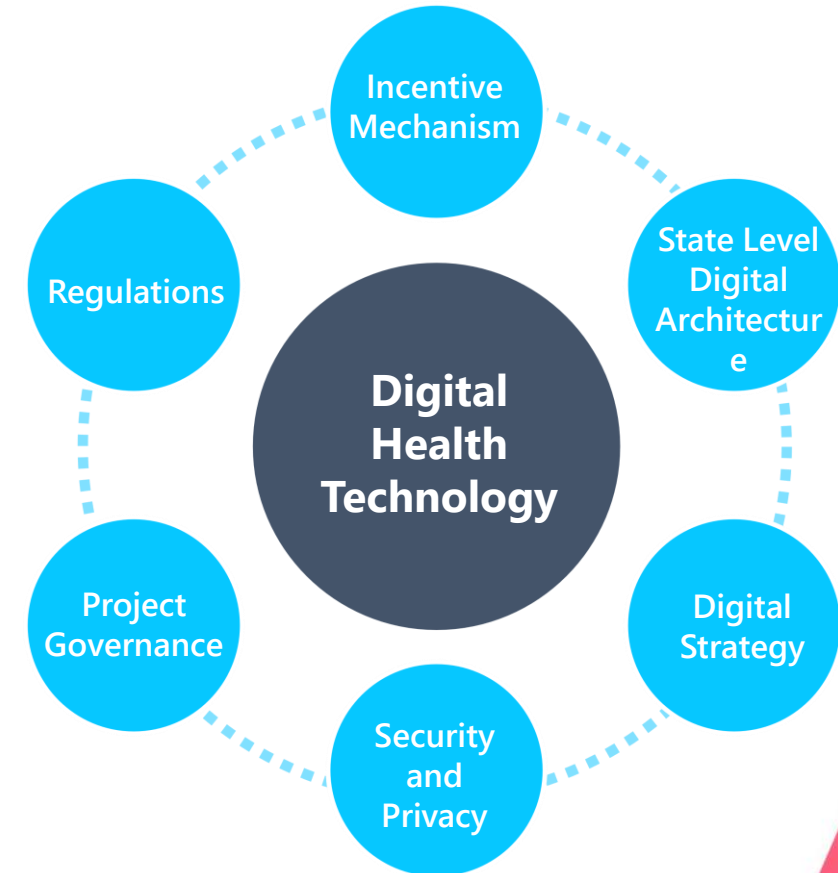

Healthcare
Israel

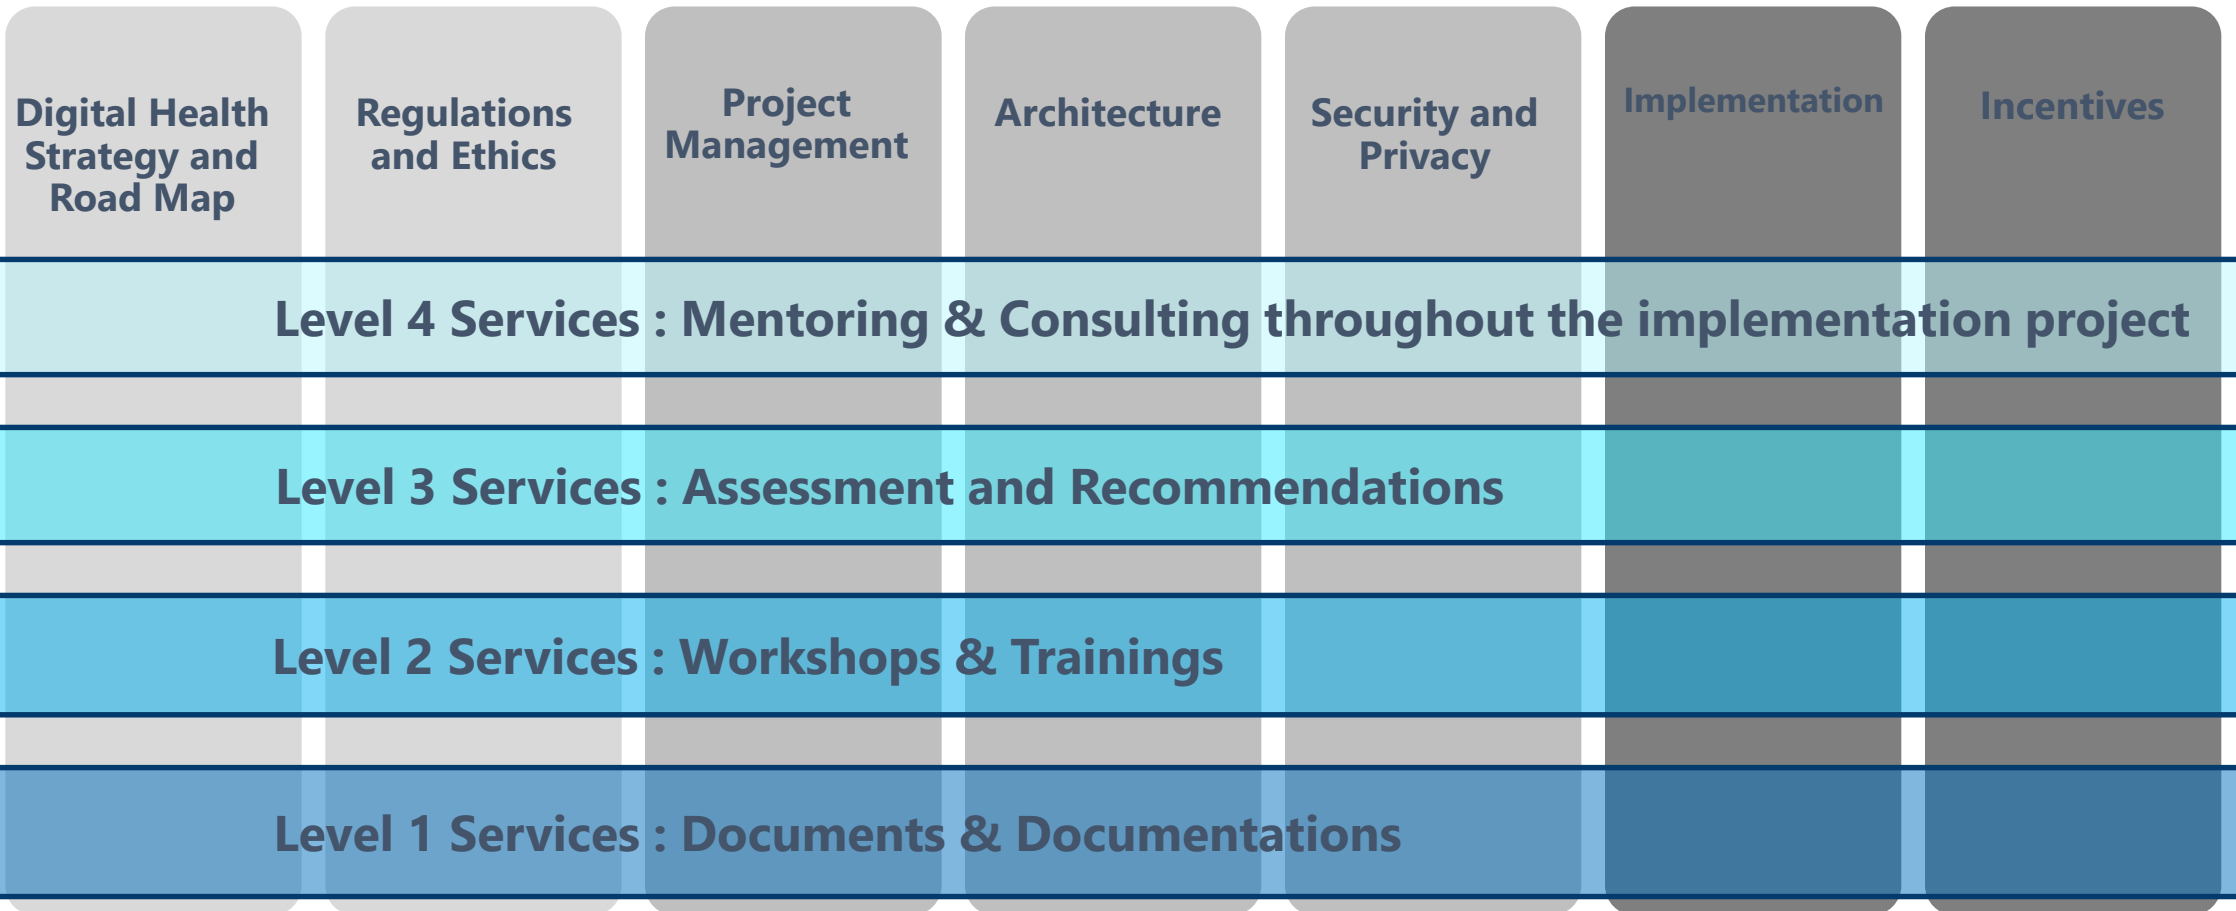

Healthcare Israel Services offering

Transformative Framework Services

- A successful project **needs much more than just excellent technology**
- In digital transformation, the transformation comes first, and the digital solution follows.
- To lower the risks and increase chances for success, we offer a supplemental package of transformative framework services.

HCI's Digital Health services and areas of expertise

THANK YOU!

Amir Gilboa

Digital Health Director
